The Beautiful **POTHOS AUREUS WILCOXI**

Golden Ceylon Creeper

A tried
and proven
house plant
of
exceptional merit

3-inch pot plant of Pothos aureus Wilcoxi

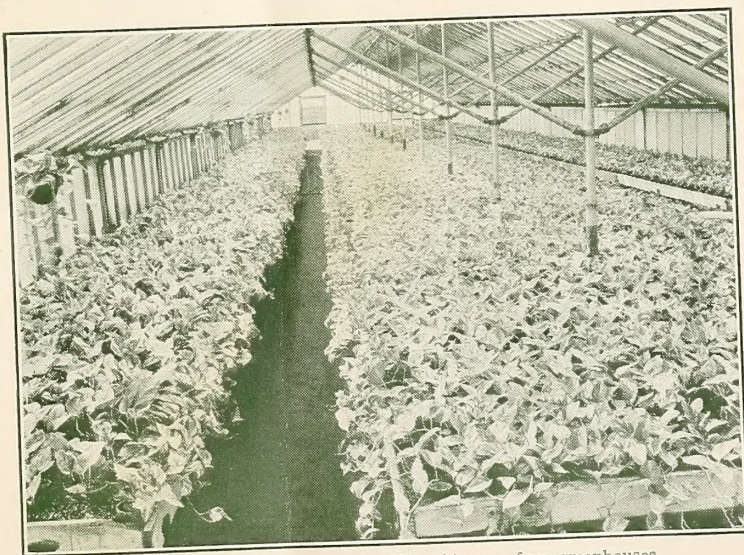

This is a real improvement over the old, widely known Pothos aureus because its foliage is more distinctly and beautifully variegated combining a golden background with showy markings of different shades of green. The golden shades cover more than half the surface of the leaves and they extend to the stems which are ivory color with an occasional tint of pink.

Pothos aureus Wilcoxi is a superb house plant that may be displayed in hanging baskets indoors or out. It also is easy to grow in bowls filled with water without the use of any soil. Those who have house plants in large tubs or pots will find it ideal to cover the sides of these receptacles as well as the soil surface which adds considerably to the appearance of such plants. Trained on cork or bark it is particularly attractive while during the summer it fills the need of a trailing plant to cover the sides of porch and window boxes.

Pothos aureus Wilcoxi is exceptionally
fine for hanging baskets indoors
and out

Sturdy little plants well established in 2-inch pots **\$3.50** per doz.; **\$25.00** per 100. 3-inch pots with vines 6 to 10 inches long **\$4.50** per doz.; **\$35.00** per 100.

NEW ROSES

Three Outstanding New Hybrid-Tea Roses from California

Every year brings us new and improved Roses originated in various sections of the country. California, however, has contributed most consistently some of the finest and most desirable varieties and we believe that the three offered on this page are so meritorious that soon every larger Rose garden will include them. Mrs. J. D. Eisele was first offered just a year ago, whereas Fluffy Ruffles and Little Beauty are now offered for the first time. We supply strong, dormant stock of these for winter delivery.

Fluffy Ruffles

Fluffy Ruffles

Howard & Smith 1935

A new duplex Rose of exceptional merit destined to great popularity as it is a variety that will keep the garden overflowing with glowing flowers the summer long. The fact that the blooms last remarkably long contributes considerably to the continuous display in the garden. The flowers are produced on long, strong stems arranged in clusters composed of from 6 to 10 dainty blooms each. It is a charming Rose of a fascinating soft silvery pink color enhanced by the deep rose reverse of the petals. It is exceptionally fine for cutting in the expanding bud. \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

Little Beauty

Howard & Smith

With this variety Mr. Howard introduced to the Rose world the herald of an entirely new race of ever-blooming Roses. The color of the formally arranged flowers is a brilliant cerise-pink. The blooms are produced in great abundance. A bed of them presents a truly enchanting sight. An outstanding varietal feature is the eventual passing of the flowers to a pleasing soft deep pink with a warmth and loveliness that must be seen to be appreciated. It is a splendid Rose for garden decoration combining a mass color effect with quantity of blooms borne in a continuous succession throughout the season. But it is also indispensable as a producer of excellent cut flowers for the home and table adornment. \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

WHOLESALE LIST

Three Lovely Hybrid-Tea Roses of European Origin

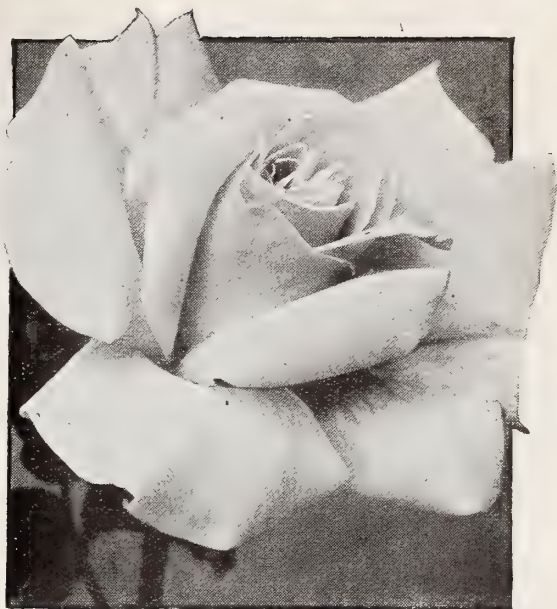

Roses are truly international flowers and there is not a continent where they do not play an important role in the small cottage garden and the large estates alike. From the long list of new European varieties we have selected the three offered here as the finest and most outstanding for our American climate. You, too, will marvel at their beauty and charm.

Crimson Glory

Crimson Glory U. S. Plant Patent No. 105

This beautiful Rose gives every promise of becoming one of our most popular and best garden varieties. It is a vigorous grower producing a great abundance of superb blooms. The plant is of spreading habit so desirable for garden planting. The large buds are of typical urn-shape as shown in the illustration above. They open into full, well formed blooms of a deep vivid crimson, shaded ox-blood red and finished with a soft velvety nap. Awarded Silver Medal International Flower Show, New York, Spring 1934. \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

Mme. Joseph Perraud

Mme. Joseph Perraud Gaujard 1934

Winner of the Bagatelle Gold Medal 1934 and was also awarded at Lyon, France, the honor of being "The Most Beautiful Rose in France" for the year 1934. In our own trial grounds this summer it stood out among the thousand or more varieties and enraptured visitors were in enthusiastic accord with the high acclaim bestowed upon it in its land of origin.

The long, slender, and pointed Nasturtium orange buds open into sweetly fragrant flowers of a charming Nasturtium buff straying to a most charming shade of shell pink at the petal edges—the nearest to a pure buff that can be visualized in a Rose with the lightened shade of pink at the petal margins adding an enchanting lustre to the blooms. \$3.00 each; \$30.00 per doz.

Glowing Sunset

Kordes 1934—U. S. Plant Patent No. 104

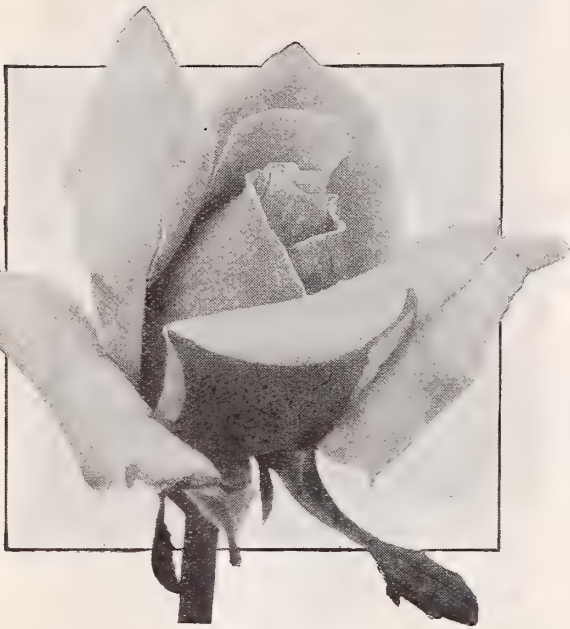

A glorious new Hybrid-Tea Rose of a most exceptional color combination and petal formation. The long pointed buds open to full double flowers of most artistic form with the inner petals lengthened and twisted in the bizarre manner of a choice Cactus Dahlia. They have an alluring fragrance that will endure them to everybody. In addition to the valuable characteristics mentioned it is a free and continuous bloomer. \$1.00 each; \$10.00 per doz.; \$80.00 per 100.

The color of the flowers is a delicate yellow. \$30.00 per 100.

Trailing Hybrid-Rugosa Rose, Max Graf

Makes an excellent pillar or climbing Rose, but will be found most valuable as a ground cover for which purpose it is far superior to any of the Wichuriana varieties. Its flowers are large, single, bright pink with prettily crimped petals. For planting on a steep bank or for trailing over a stone wall, it has no equal. \$30.00 per 100.

New Giant Hybrid Hemerocallis

These new Giant-Flowered Yellow Day Lilies have been selected from the choicest varieties of recent introduction by American and European hybridizers. They are a great improvement on the older types and should be in every garden. The flowers are not only very large but pure in color. The difference in the blooming period of the varieties offered below provides a flowering season much longer than that of the older sorts. We highly recommend these.

Anna Betscher. Round, deep canary yellow flowers. Dwarf. Late.

George Yeld. Large open flowers. The outer petals are a rich orange, the inner ones flushed orange-bronze. Midseason.

Any of the above varieties in strong 4-inch pots:

60c each; \$6.00 per doz.

Erica—Heath

Most of these Heaths are compact, low-growing, and extremely useful for rockeries. The small foliage is densely arranged around the wiry stems, and either in full bloom or in mid-winter they make a very pretty picture. Give some protection the first winter to acclimatize them. Semi-shady location.

Vagans (Cornish Heath). Compact growing evergreen shrub with dark green small foliage and pale purplish red flowers in August and September; 12 inches. A good rock plant for a semi-shaded position.

Viburnum rhytidophyllum

A rare variety, particularly attractive on account of its large dark green, nearly evergreen foliage, the yellowish white flowers are followed in September by red berries finally turning black. 6-inch pots \$1.00 each.

Flowers borne continuously from early June until late October. Every branch bears a terminal truss of 15 to 20 orange-scarlet, long tubular flowers. Foliage dark green with glaucous reverse. Cut blooms of this novelty attracted much favorable attention in our display at the Atlantic City Flower and Garden Pageant, September, 1932. Vitex macrophylla
The Rare Chaste Tree

**Pyracantha (Crataegus)
coccinea Lalandi**

**Firethorn or Evergreen
Thorn**

There is no other fruiting evergreen shrub that is so attractive throughout the year as this fiery Thorn. It will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high. May be planted either in connection with other shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which remaining on the plants throughout the winter produce a gorgeous effect.

Field-grown plants of Pyracantha are very difficult to transplant. The stock we offer has therefore been grown in pots. Strong 5-inch pots 75c each.

Buddleia Ile de France

New Butterfly Shrub

**Buddleia Ile de
France**

Greatly superior to the old popular varieties through its brilliant coloring, longer and more graceful spikes of bloom, and its more uniform habit of growth.

Height 3 to 4 feet forming a bushy shrub of symmetrical shape. Spikes, 6 to 9 inches, of a brilliant rosy violet-purple—very fragrant.

Strong 3½-inch pots \$2.50 per doz.; \$15.00 per 100.

Dreer's "Riverton" Tubs

Riverton Tub

This tub is unquestionably the neatest plant tub obtainable. Its adoption as the Dreer standard was the result of countless experiments at our Nursery. Comparisons will show the Riverton tub to be at least one inch deeper than others being offered. Made of cedar, with electrically welded hoops painted green. The four largest sizes are supplied with drop handles.
